

# Data Comparison Tool- REDCap – How-To Guide

## Data Comparison Tool

The data comparison tool can be located by using the link found under **Applications**.

This feature helps users easily compare two records within the project. Users will select the desired records and hit **Compare**.

A screenshot of the Data Comparison Tool interface. It features a yellow header bar with the text 'Record ID'. Below this, there are two dropdown menus. The first dropdown menu has '112' selected, and the second dropdown menu has '147' selected. To the right of these dropdowns is a red button with the text 'Compare' inside it, which is circled in red.

REDCap will create a table showing any differences in the data input into the records, broken down by the field's label and its associated form. Fields without data stored are included in the comparison.

Label (field name)	Form Name	Record ID	
		112	147
Age (years) ( <i>age</i> )	Demographics	82	
Race ( <i>race</i> )	Demographics	American Indian/Alaska Native ( <i>AI</i> )	Asian ( <i>A</i> )
Height (cm) ( <i>height</i> )	Demographics	202	142
Weight (kilograms) ( <i>weight</i> )	Demographics	47	83
Complete? ( <i>demographics_complete</i> )	Demographics	Complete (2)	Incomplete (0)

Users can click on the data points (in red) to go to the forms and update the values.
