

Survey Settings- REDCap – How-To Guide

Enable Survey

You can enable any instrument as a survey and then collect data for that instrument from survey respondents. The only difference between an instrument and a survey is who will be entering the data: project users, survey participants, or both.

For surveys, you may utilise a Participant List for emailing your recipients and to track who has taken your survey(s). And if your first data collection is enabled as a survey, then you may use a public survey link, which is a single link that can be emailed to all participants or even posted on a website.

- Go to **Project Setup**

- In the top box **Main Project Settings** click **Enable** Use surveys in this project?

- Next click on **Online Designer**

- Select **Enable** for the forms you want to use as surveys.

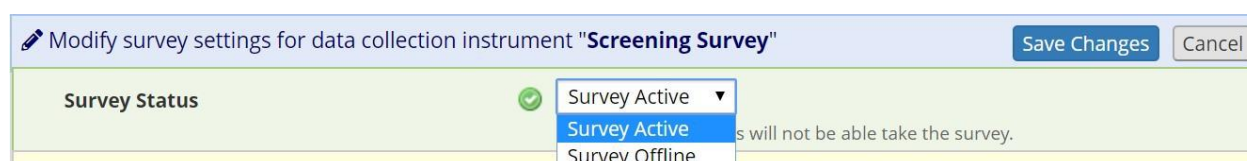

Survey Settings

Once you enable your data collection instrument as a survey, the “Survey Settings” page will appear.

You can make changes to Survey Settings at any time. To get to the Survey Settings click on the Designer link on the left-hand navigation bar under Project Home and Design.

Survey Status

A survey can be Active (online) or Inactive (offline). The default setting is online

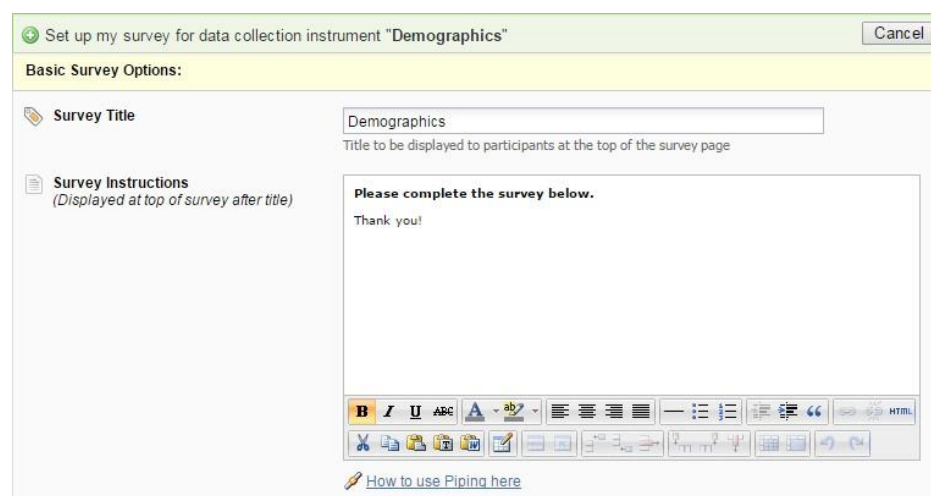

Modify survey settings for data collection instrument "Screening Survey" Save Changes Cancel

Survey Status		<div>Survey Active ▼</div> <div>Survey Active</div> <div>Survey Offline</div>	s will not be able take the survey.
---------------	---	---	-------------------------------------

Basic Survey Options in Survey Settings

Survey Title: The default survey title is the name of the instrument. However, your survey title does not have to be the same name as your instrument. You can change the title here in Survey Settings.

Survey Instructions: Enter any instructions you wish to give to the participant. The default instructions are “Please complete the survey below. Thank You!” Oftentimes it is helpful to include a contact email address if the person has questions or the deadline by when you need them to complete the survey.

Set up my survey for data collection instrument "Demographics" Cancel

Basic Survey Options:

 **Survey Title**

Title to be displayed to participants at the top of the survey page

 **Survey Instructions**
(Displayed at top of survey after title)

Please complete the survey below.

Thank you!

Survey Design Options

Logo: Click the Choose File icon and add a logo.

Size of survey text: Use the drop down and select Normal, Large or Very Large.

Font of survey text: Use the drop down and select the font family you would like to use.

Survey Theme: Use the drop down to select a saved survey theme, including a CMH survey theme. Otherwise you may click Customize and change the color of your backgrounds, fonts and buttons. If you would like to use the same color choices at a later date, click the Save custom theme icon.

Survey Design Options:

Logo
(Optional: display an image above the survey title)

Add new logo:
 No file chosen
(Images wider than 600 pixels will be downsized to fit page.)
☐ If using a logo, hide survey title on survey page?

Survey design preview (sample survey):

This is the survey title

Your survey instructions will go here. The instructions can tell your survey participant about the purpose of the survey once they have completed the survey. Below is a listing of various question types that might be displayed on your survey.

This is a section header to divide the survey page into sections.

What is your first name?

Survey Customizations in Survey Settings

Survey Customizations:

Question Numbering

Question Display Format
(One page or multiple pages?)

☐ Display page numbers at top of survey page

☐ Hide the 'Previous Page' button (i.e., Back button) on the survey page
(prevents respondents from going back to previous pages)

For 'Required' fields, display the red 'must provide value' text on the survey page?

If 'No', then it will NOT display the following text beneath all 'Required' fields: * must provide value

Allow survey respondents to view aggregate survey results after completing the survey?

After completing the survey, participants can view ALL responses in aggregate graphical format and/or as descriptive statistics. Also, the individual respondent's answers will be highlighted in the results.

Additional settings:

Minimum number of responses required before participants are allowed to view aggregate data (recommended = 10).

☒ Do not show plots for questions lacking diversity in response values?
(What does this mean?)

Text-To-Speech functionality
(Allows text on survey page to be read audibly to participants.)

When enabled, icons will be displayed next to all text on the survey page, and when clicked, the text will be read out loud to the participant (must have computer speakers turned on).

NOTICE: All text that is spoken is sent to a service hosted at Vanderbilt University that utilizes the AT&T Text-to-Speech API service. Be advised that if the survey utilizes piping, for privacy concerns, data piped from Identifier fields will "not" be sent to the service with the rest of the text but will instead be redacted.

Question Numbering

REDCap will by default auto number survey questions. The exception is if you have branching logic in your survey. In that case, auto-numbering is disabled and instead your questions are custom-numbered.

Question Numbering

For custom numbering, each question's number will be blank by default until manually added via the Online Designer or Data Dictionary.

Custom numbered ▾

Question numbers will not display correctly if using auto numbering if some questions have branching logic employed. Question auto numbering has been automatically disabled because some of your survey questions use branching logic.

Custom numbering of questions in Survey

If you change the setting to custom numbering, question numbers will be removed. If you set your Survey Settings so that your questions are custom numbered, you will see a 'Question Number' box for each field of that survey in Online Designer:

Edit Field

You may add a new project field to this data c
bottom. When you add a new field, it will be a
you may view the [Field Types video \(4 min\)](#).

Field Type:

Question Number (optional)

Displayed only on the survey page

You can enter your custom question number there (or leave it blank.)

Question Display Format in Survey Settings

All on one page: Select this if you would like all of your questions placed on one page.

One section per page (multiple pages): Select this option if you would like to break your survey up into sections by your section headers (the yellow banner bars). If you select this option, you can display the page numbers at the top of the survey page and also hide the "Previous Page button".

Survey Design Tip: Using Descriptive Text field as a section sub-heading

If you want to break up the content of the survey page but don't want the participant to have to go to a new page (which is what a 'Begin New Section' field type will cause), use the descriptive text field instead.

For example, using html coding you could type this as your field label:

```
<div class="blue" style="font-weight:bold;">A descriptive text field used as a  
sub-heading</div>
```

Edit Field

You may add a new project field to this data collection instrument by completing the fields below and clicking the Save button at the bottom. When you add a new field, it will be added to the form on this page. For an overview of the different field types available, you may view the [Field Types video \(4 min\)](#).

Field Type: Descriptive Text (with optional Image/File Attachment)

Question Number (optional)
Displayed only on the survey page:

Field Label
`<div class="blue" style="font-weight:bold;">This is a descriptive text field used as a sub-heading</div>` [How to use Piping](#)

Variable Name (utilized during data export)
desc01 ☐ Enable auto naming of variable based upon its Field Label?
ONLY letters, numbers, and underscores

Attach an image or file (optional)
[Upload document](#)

If attachment is an image file, display as inline image or as link on page?
☒ Link
☐ Inline image
(Images wider than 600 pixels will be downsize to fit page.)

Looking for Branching Logic? Try clicking the  icon for this field after clicking the Save or Cancel button below.

Save **Cancel**

Section 1 (This is a section header with descriptive text. It only provides informational text and is used to divide the survey into sections for organization. If the survey is set to be displayed as "one section per page", then these section headers will begin each new page of the survey.)

You may create MULTIPLE CHOICE questions and set the answer choices for them. You can have as many answer choices as you need. This multiple choice question is rendered as RADIO buttons.

☐ Choice One
☐ Choice Two
☐ Choice Three
☐ Etc.

reset

This is a descriptive text field used as a sub-heading

You may also set multiple choice questions as DROP-DOWN MENUS.

Allow participants to download a PDF of their responses at end of survey?

The default setting is no.

The respondent will see a PDF button on the confirmation screen (screen they see after they hit the survey submit button).

Close survey

Thank you for taking the survey.

Have a nice day!

Download your survey response (PDF):  **Download**

All fields viewable to the survey respondent on the screen, regardless of whether or not they answered the question, are included in the PDF. This means that if a HIDDEN [action tag](#) is used on a field in the survey, that field will not be visible in the PDF.

Exceptions: This option is not available if the Survey Auto-continue feature is enabled or if the Survey queue auto-start option is enabled.

Survey-specific email invitation field in Survey Settings

You may have a project with multiple surveys where different people are completing the survey for the same record. If you wish to designate which person should be sent the invitation for that specific survey, you would select that designated email field from the drop-down list.

Note: only text box fields that have been validated as an email address show up on the drop-down list.

For “Required” fields, display the red ‘must provide value’ text on the survey page

The default setting is Yes. If you do not wish to have the ‘must provide value’ field display on your survey, use the drop down and select No.

Allow survey respondents to view aggregate survey results after completing the survey

The default setting is disabled. Otherwise you may choose to display Graphical Plots, Descriptive Statistics or both plots and statistics. If you enable this setting, you can choose the minimum number of responses before participants are allowed to view the aggregate data.

Text-To-Speech functionality

The default settings is Disabled. When enabled, icons will be displayed next to each text that is listed on the survey. When clicked, the text will be read out loud to the participant.

Survey Access in Survey Settings

How a survey participant accesses the survey can be set in the Survey Access section of Survey Settings.

Survey Access:

Response Limit (optional)
(Maximum number of responses to collect. Prevents respondents from starting the survey after a set number of responses have been collected.)

(e.g., 150) If left blank, the response limit will not be enforced.
Will include
Custom text to display to respondent on survey when limit is reached:

Time Limit for Survey Completion (optional)
(The amount of time that each respondent has to complete the survey based on when they were initially sent the survey invitation. Note: This feature excludes public survey links.)

days hours minutes
If the respondent loads the survey after this time has passed, it will not allow them to begin or continue the survey. (If all are left blank, the time limit will not be enforced.)

Survey Expiration (optional)
(Time after which the survey will become inactive.)

 M/D/Y H:M
The time must be for the time zone **America/Chicago**, in which the current time is **12/31/2018 13:31**.

Allow 'Save & Return Later' option for respondents?
(Allow respondents to leave the survey and return later.)

☐ Allow respondents to return without needing a return code
☐ Allow respondents to return and modify completed responses

Response Limit (optional): Default is blank

This setting prevents respondents from starting the survey after a set number of responses have been collected. You can specify if a response is only completed responses or partial/completed responses. You can also modify the stock language that is shown when the limit is reached.

Time Limit for Survey Completion

You can use this setting if you wish to limit the amount of time a respondent has to complete a survey after it was sent to them.

This only works when you have a participant list – it will not work on public survey links. It's ideal if you want to keep a survey open but will have rotating groups of people taking it.

Note: the language displayed to the participant is not customizable.

Survey Expiration (optional): You may enter a date/time you would like for your survey to expire. This saves you the trouble of going to survey settings and changing the survey status to inactive (especially helpful if you want the survey to go offline when you are not at work!)

Allow 'Save & Return Later' (Save and Return Later) option for respondents: You may enable this option if you would like your participants to be able to come back and finish taking their survey.

If enabled, the participant will receive a generated code they must enter in order to continue. If you want them to be able to return to the survey without needing a code, you can check that box. **NOTE: If you are collecting identifying information (e.g., PII, PHI), for privacy reasons it is HIGHLY recommended that you leave the option unchecked so as to enforce a return code.**

You may also indicate if you would like your participants to be able to return and modify their completed responses.

Survey Termination Options in Survey Settings

Survey Termination Options:

☐ **(Optional) Auto-continue to next survey:** Automatically start the next survey instrument after finishing this survey ?

— OTHERWISE —

☐ **Redirect to a URL**
(Redirect to a webpage when survey is completed)

— OR —

☒ **Survey Completion Text**
(Displayed after survey is completed as 'thank you' text or as acknowledgement text)

Provide a full URL, e.g. <http://www.example.com/mypage.html>

[How to use Piping here](#)

Thank you for taking the survey.
Have a nice day!

[How to use Piping here](#)

PDF Auto-Archiver
Upon survey completion, a compact PDF copy of the survey response will be automatically stored in the project's File Repository, from which the archived PDFs can be downloaded at any time.

☒ Disabled
☐ Auto-Archiver enabled
☐ Auto-Archiver + e-Consent Framework [What is the e-Consent Framework?](#)
(includes end-of-survey certification & archival of PDF consent form)

Send confirmation email (optional)?
(Email the respondent when they complete the survey)

No ▾

Auto-continue to next survey

Click this if you have more than one survey and you would like the next survey to automatically start as soon as this survey is completed. If you want the respondent to complete a subsequent survey at a later time or only if they answered questions with a specific answer, then you would not want to enable this feature. See Survey Invitations for further information.

Note: if you have auto-continue enabled and then set up a Survey Queue, auto-continue is not automatically disabled. In fact, it will trump your Survey Queue settings.

Redirect to a URL

If you would like the participant to be redirected to another URL after they have completed their survey, enter the full URL. For instance, if a person is registering for an event and you have a website for your event, you could enter that website here.

Allow respondents to repeat the survey

If the instrument is enabled as a repeating instrument, you will see these options in the Survey Settings.

☐ **(Optional) Allow respondents to repeat the survey:** Ask them to take the survey again upon completion, if they wish.

Set custom text for the button:

Location of the button on survey:

Survey Completion Text

Enter any text you wish to display after the participant has finished taking your survey. The default text is "Thank you for taking the survey. Have a nice day!"

PDF Auto-archiver

With this setting enabled, upon survey completion, a compact PDF copy of the survey response will be automatically stored in the project's File Repository, from which the archived PDFs can be downloaded at any time. The default setting for this option is 'no'.

Auto-Archiver + eConsent Framework

This setting not only will save the version of the completed survey to the file repository, but it will provide a summary screen to the respondent. The respondent has to review that summary screen before clicking submit.

 **PDF Auto-Archiver**
Upon survey completion, a compact PDF copy of the survey response will be automatically stored in the project's File Repository, from which the archived PDFs can be downloaded at any time.

☐ Disabled
☐ Auto-Archiver enabled
☒ Auto-Archiver + e-Consent Framework [What is the e-Consent Framework?](#)
 (includes end-of-survey certification & archival of PDF consent form)

e-Consent Framework Options: For e-Consent it is sometimes required to include the consenting participant's name (and date of birth in some cases) on the final consent form as extra documentation of their identity. Below you may select fields used to capture that info. You may also enter the current e-Consent version and Consent type for this form. The values for the fields below will be automatically inserted into the footer of the PDF consent form that the participant will review at the end of the survey, after which that PDF 'hard-copy' will be archived in the File Repository. [Read more](#)

e-Consent version: e.g., 4

First name field:

Last name field:

Note: If you are using a single field to capture whole name, you may select it for either first/last name above while leaving the other name field unselected.

Optional fields (these are not always necessary for e-Consent):

e-Consent type: e.g., Pediatric

Date of birth field:

It is highly recommended that you have a discussion with your local Institutional Review Board (IRB) if you wish to do e-Consent in REDCap.

 **Send confirmation email (optional)?**
(Email the respondent when they complete the survey)

Yes ▾

Provide email subject, email message, and (optionally) an attachment to be sent to respondent when they complete the survey. [How to use Piping here](#)

From:

Subject:

Compose **Preview** [Send test email](#)

Attachment: No file chosen

☐ Include PDF of completed survey as attachment

⚠ WARNING: Since email is not considered a secure form of communication, the PDF attachment option is NOT recommended if the survey contains questions asking for identifying information (e.g., PHI).

ℹ Note: Because the e-Consent Framework option is enabled on this page, the PDF in here will not be the full-length PDF but will be the 'compact' PDF, which omits unanswered questions and unselected choices.

Survey Inactive Comparison

There are several ways a survey can be taken offline. Here is a side-by-side comparison to help you choose the one that best suits your needs:

Inactive Survey Setting Comparison

Survey Status	Survey Expiration	Response Limit	Time Limit for Survey Completion
At top of survey settings page	In Survey Access section of Survey Settings	In Survey Access section of Survey Settings	In Survey Access section of Survey Settings
Manual	Automatic	Automatic	Automatic
Survey-level (affects all participants)	Survey-level (affects all participants)	Survey-level (affects all participants)	Participant-level
Not time-specific	Time-specific	Not time-specific	Time-specific
Does not require use of Participant List	Does not require use of Participant List	Does not require use of Participant List	Requires sending survey invitation via Participant List (not using Public Survey Link)

Best practices for Survey Settings if collecting PHI (Protected Health Information)

If collecting PHI, in Survey Settings...

- Set customization to allow download but DON'T attach completed responses to confirmation email
- If enable save & return, don't tick box to allow participant to return without a return code

To change an instrument from a survey back into a data entry form (reverting a survey to a data entry form)

If you have designed an instrument as a survey but want to change it back to a data entry form, go to Survey Settings (Project Setup/Online Designer) and click on the Delete Survey Settings button at the bottom of the page.

Delete Survey Settings: Please note that deleting the survey settings will NOT delete any responses collected using the survey. Also, deleting the survey settings will NOT delete the data collection instrument, but instead the instrument will revert back to how it was before it was enabled as a survey, in which data can only be collected by authenticated users on the data entry form.
